

Step-Through Frame Folding Electric Bicycle

This flat folding electric bicycle is designed with a step-through frame for easy access. It features a front headlight and a rear seating area, along with a stable three-wheel design.

Overview

Designed for Accessibility and Stability

This folding electric bicycle features a convenient step-through frame design, making it exceptionally easy to mount and dismount. Engineered for stability, it utilizes a unique three-wheel configuration with a front wheel and two rear wheels. The design is completed with practical features including a front headlight and a comfortable rear seating area equipped with a backrest.
