

Step-Through Frame Motorcycle

This motorcycle features a step-through frame, making it suitable for urban commuting. It is equipped with a single seat and spoke wheels.

Overview

Urban Commuting Solution

This step-through frame motorcycle, commonly known as an underbone or moped, is engineered for efficient urban commuting and short-distance travel. Featuring a practical single-seat design and a robust, functional mechanical layout, it offers an affordable and reliable transportation option. The integrated front fairing, complete with headlight and turn signals, ensures visibility and safety in city environments.
