

Step-Through Frame Motorcycle with Panniers

This motorcycle has a step-through frame design and is powered by a gasoline engine. It features a luggage rack and side panniers for practical storage.

Overview

Urban Commuter and Touring Motorcycle

This step-through frame motorcycle is engineered for both efficient urban commuting and comfortable light touring. It features a robust single-cylinder engine and a distinctive design with a protective front fairing and integrated windscreen. Equipped with practical rear luggage racks and side panniers, it offers excellent utility for daily transport and weekend trips.
