

# Step-Through Motorcycle

This is a step-through motorcycle, often referred to as a 'cub' or 'moped-style' motorcycle. It features a small displacement engine, typically under 125cc, making it fuel-efficient and suitable for urban commuting.

## Overview

### Urban Utility Step-Through Motorcycle

This step-through motorcycle, often classified as a 'cub' or moped-style vehicle, is engineered for efficient urban commuting and light utility tasks. Its accessible frame design allows for effortless mounting and dismounting, while the integrated cargo solutions make it a practical choice for daily errands. With its fuel-efficient small displacement engine, this motorcycle provides a reliable and economical solution for basic transportation needs.
