

Step-Through Motorcycle with Fairing

This motorcycle has a step-through frame and front fairing. It also features a rear rack for carrying cargo.

Overview

Versatile Step-Through Design

This step-through motorcycle is engineered for ease of use and daily commuting efficiency. Featuring a robust front fairing for improved aerodynamics and rider protection, it combines practical utility with a comfortable riding position. The integrated rear rack enhances its capability for light cargo transport, making it an ideal choice for urban logistics or personal transportation.
