

Step-Through Motorcycle with Front Basket and Rear Carrier

This is a step-through motorcycle, also known as a 'cub' or 'moped-style' motorcycle. It features a front basket, a rear carrier with a backrest, and a step-through frame design for urban commuting and light transportation.

Product Overview

Urban Commuter Solution

This step-through motorcycle, designed in a classic cub or moped-style, is an ideal solution for efficient urban commuting and light cargo transportation. Its practical design includes a convenient front basket and a rear carrier with a backrest, ensuring comfort and utility for daily tasks. Built with a robust single-cylinder engine and reliable drum brakes, it balances maneuverability with essential functionality for professional or personal use.
