

Step-Through Motorcycle with Front Basket and Rear Rack

This step-through motorcycle is equipped with a single-cylinder engine. It includes a front basket for small items and a rear rack for additional cargo.

Product Overview

Urban Utility Motorcycle

This step-through motorcycle is engineered for efficient urban commuting and light-duty transportation. Featuring a robust single-cylinder engine and versatile storage options including a front basket and rear rack, it provides a practical solution for navigating city environments. Its classic design, combined with reliable features like an electric starter, ensures a balance of comfort and functionality for daily use.
