

Step-Through Motorcycle

This step-through motorcycle features a front basket and rear rack for cargo. Its step-through frame allows for easy mounting and dismounting.

Overview

Practical Step-Through Design

This step-through motorcycle, often categorized as an underbone or moped, is engineered for efficiency and ease of use in urban environments. Its accessible frame design allows for effortless mounting and dismounting, while the integrated front basket and rear rack provide essential utility for daily transport needs. Built with a reliable single-cylinder engine, this motorcycle offers a practical, economical solution for professional and personal commuting.
