

Sterilized Bamboo Shoot Processing Machine

This machine processes bamboo shoots, ensuring they are sterilized and ready for consumption. It utilizes high-temperature sterilization techniques to maintain food safety standards.

Product Overview

Premium Sterilized Bamboo Shoots

These high-quality boiled bamboo shoots are expertly processed using high-temperature sterilization methods to ensure maximum food safety and shelf stability. Designed for convenience and versatility, they are pre-cooked and vacuum-packed to maintain freshness and natural texture. This product offers a reliable, natural, and vegetarian-friendly ingredient suitable for a wide range of culinary applications.

Product Details

Net Weight	40 g
Processing Method	High-temperature sterilization
Packaging Type	Vacuum-packed

Key Features

Usage Readiness

Pre-cooked • Ready to use

Dietary Attributes

Natural, Vegetarian, No Preservatives
