Product Overview

High-Efficiency Steam Sterilization

This sterilized steam mop cleaner provides a chemical-free way to maintain a healthy home environment by eliminating 99.9% of bacteria and viruses using high-temperature steam. Engineered for performance, it features a rapid 45-second heating cycle and an ergonomic telescopic handle for ease of use. It is designed to work effectively on various surfaces including sealed hardwood, tile, and laminate.

Performance Specifications

Rapid heating and 180-degree maneuverability for efficient floor cleaning.

Power & Heating

1300 W
Max Power

45 s
Heat-up Time

320 ml
Water Tank

15 min
Runtime

Electrical Requirements

220-240V, 50/60Hz

Design & Utility

Physical Features

- 5 meter power cord
- Telescopic aluminum pole
- Triangular mop head for corners
- 180-degree rotation

Compliance & Safety

Safety Protections

- Overheat protection
- Auto-off feature
- Low-water shut-off

Certifications

CE, CB, ETL, GS, Gmart
