

Stick Pack Filling Machine

This automated filling machine is designed for stick-pack packaging. The machine provides reliable measurement and firm sealing for diverse product types.

Product Overview

Versatile Stick Pack Filling Solution

This automated stick pack filling machine is designed for high-efficiency packaging of various liquid and semi-liquid dairy and beverage products. Utilizing a robust 304 stainless steel construction and advanced PLC control, it ensures reliable measurement, firm sealing, and minimal contamination through airless pressurized filling. The system features an intuitive man-machine interface and modular design, making it an ideal, cost-effective solution for modern production lines.

Technical Specifications

Material Construction	304 Stainless Steel
Control System	PLC System with Man-Machine Visualization Interface
Filling Technology	Airless Pressurized Filling
Safety Features	Earth-leakage protection, Emergency stop, Safety guards

Operational Capabilities

Suitable Products

- Milk and Yogurt
- Lactic acid drinks
- Japanese tofu
- Soy sauce
- Cooking oil
- Mineral water
- Cleaning supplies
- Alcohol
- Coconut oil

Automated Functions

- Filling
- Sealing
- Dropping bags

Maintenance Design	Modular design for easy maintenance
