

Stone Block Cutting Machine

This machine is designed for cutting large blocks of stone. It features a heavy-duty frame, a motorized saw head, and a moving platform for precise cutting.

Overview

Industrial Stone Processing Solution

This heavy-duty stone block cutting and fold-bend machine is engineered for high-precision stone processing in demanding environments like quarries and fabrication facilities. It features a robust, industrial-grade frame equipped with a motorized saw head and a high-performance circular saw blade. Designed for efficiency, the machine utilizes a moving platform system to ensure accurate cuts on large stone blocks, making it an essential asset for professional stone manufacturing workflows.

Technical Specifications

Key Construction Features

- Heavy-duty industrial frame
- Motorized saw head assembly
- Integrated control panel
- Precision moving platform

Machine Type	Stone Block Cutting & Fold-bend Machine
Application Area	Quarrying, Stone Processing, Industrial Fabrication
