

Stone Crusher Belt Conveyor

This belt conveyor is designed for use with stone crusher machines and other industrial applications. It ensures efficient and reliable material handling.

Product Overview

High-Efficiency Industrial Conveying Solutions

This versatile belt conveyor system is specifically engineered for demanding environments such as stone crushing, food processing, and automated packing lines. Featuring a robust steel frame and durable belt materials, it ensures continuous and reliable transport of bulk aggregates, grains, or packaged goods. The modular design allows for seamless integration into existing production workflows, offering both inclined and horizontal configurations to meet specific spatial requirements.

Technical Capabilities

Available Conveyor Types

- Inclined Belt Conveyors
- Horizontal Belt Conveyors
- Curved Roller Conveyors
- Double-deck Roller Conveyors
- Chain-driven Systems

Suitable Materials

Crushed Stone, Gravel, Aggregates, Grains, Granular Products, Cartons, Bottles, Cans

Design & Construction

Safety & Protection

Yellow Safety Guards • Safety Edge Protection • Integrated Belt Guides

Belt Characteristics

- High-strength wear-resistant material
- Corrugated belt options for steep inclines
- Green industrial-grade surface
- Adjustable belt speed

Frame Construction

Heavy-duty steel and stainless steel options with adjustable support legs

System Integration

Ready for Smart Manufacturing

The system is designed for full integration with industrial automation components including PLCs, sensors, and variable frequency drives. It supports advanced end-of-line solutions such as palletizer robots, AGVs (Automatic Guided Vehicles), and stereoscopic warehouse systems.

Target Industries

Mining & Quarrying, Construction, Food & Beverage, Packing Industry, Logistics & Warehousing

Certifications

Quality Standards

ISO 9001:2000
