

Stone Crushing Plant

This plant is designed for crushing basalt and other stones. It is suitable for applications where aggregate shape and size proportion are critical, such as asphalt road surfaces.

Overview

High-Efficiency Stone Crushing Plant

This stone crushing plant is designed for robust performance in demanding industrial environments, offering reliable material reduction for construction and mining applications. Engineered for durability and consistent output, the system integrates seamlessly into large-scale aggregate production workflows. Its design prioritizes operational efficiency and ease of maintenance to maximize uptime for professional operators.

Key Metrics

Production Capacity

200 t/h

Hourly Output

500 mm

Max Feed Size

Technical Specifications

Crusher Configuration

- Primary Jaw Crusher
- Secondary Cone Crusher
- Vibrating Screen

Power Source

Electric Motor

Certifications

Compliance & Standards

ISO 9001, CE Certified, Safety Standard Compliant
