

# Stone Grinding and Polishing Machine

This abrasive and grinding machine is designed for precise stone processing. It features a multi-axis arm for flexible operation and a robust construction for industrial use.

## Overview

### Precision Stone Processing

The HYS-2500A stone grinding and polishing machine is engineered for high-efficiency stone fabrication, providing consistent quality for grinding, polishing, and shaping tasks. It features a robust industrial-grade construction and a flexible multi-axis arm to accommodate various processing requirements. Equipped with integrated water cooling and adjustable speed controls, this machine ensures optimal performance while minimizing heat and dust during operation.

## Technical Specifications

Model Number	HYS-2500A
Core Features	Multi-axis arm, Adjustable speed, Water cooling system, Industrial construction

## Performance Metrics

### Performance Highlights

**2500 A**

Model Series

## Capabilities

### Processing Capabilities

- Stone Grinding
- Stone Polishing
- Stone Shaping
