

Stone Shaping and Polishing Tool Set

This set includes tools for shaping and polishing stone. It features diamond core drill bits, router bits, and a rubber profile wheel.

Product Overview

Professional Stone Shaping and Polishing Kit

This comprehensive tool set is engineered for precision stone fabrication, offering a versatile collection of diamond core drill bits, specialized router bits, and finishing wheels. Designed for durability and accuracy, these tools allow for clean drilling, intricate edge profiling, and smooth surface finishing on various stone materials. Ideal for professional workshops, this kit provides the essential components needed to achieve high-quality results in stone shaping and edging applications.

Technical Specifications

Included Components

- Diamond core drill bits
- Profile router bits
- Rubber profile wheel

Primary Functions

Drilling • Shaping • Edging • Polishing

Material Compatibility

Stone
