

Stoning Hammer with Wooden Handle

This stoning hammer features a durable wooden handle and a robust steel head. It is designed for breaking and shaping stones, masonry work, and demolition tasks.

Product Overview

Professional Grade Masonry Tool

This stoning hammer is engineered for precision in stone shaping, masonry work, and heavy-duty demolition tasks. It features a robust steel head paired with a high-quality wooden handle, ensuring both durability and effective force distribution. The ergonomic design provides a comfortable grip and balanced weight, allowing professional stonemasons and construction workers to achieve controlled and efficient strikes.
