System Overview

Smart Store Inspection and Surveillance System

This advanced retail inspection and surveillance solution offers enterprise-grade management with multi-device linkage and unified execution standards. Designed for modern retail environments, the system features PoE power supply for easy installation, support for third-party camera integration, and comprehensive task push capabilities. It enables multi-department collaboration through an online presence, ensuring efficient store operations and robust loss prevention.

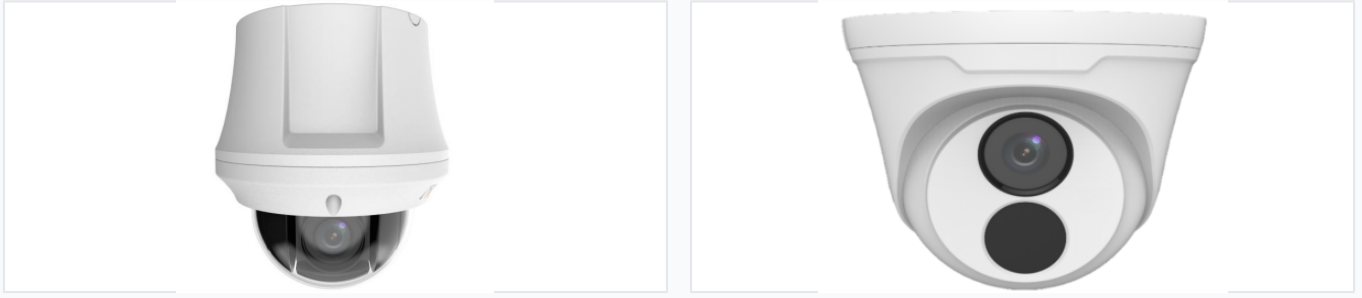

Third-Party Integration

- AXIS
- SONY
- Panasonic
- BOSCH
