Product Overview

C-Type Straight Grinding Wheels

The C-Type Straight Wheel is a precision-engineered grinding tool designed for efficient material removal and high-quality surface finishing. Featuring a classic circular design with a central mounting hole, it is constructed from abrasive grains bonded within a durable matrix. These wheels are essential for grinding machines to achieve precise dimensions and smooth finishes on a variety of materials, including metals, ceramics, and composites.

Technical Specifications

Primary Function

- Material removal
- Surface finishing
- Dimensional accuracy

Wheel Type

C-Type Straight Wheel

Suitable Materials

Metals, Ceramics, Composites
