

Straight Head Pruner for Gardening

This pruner features a straight head design for precise cutting and trimming in gardening. Its durable construction includes high-carbon steel blades for lasting sharpness and rust resistance.

Product Overview

Professional Pruning Performance

This professional-grade straight head pruner is engineered for precision trimming and maintenance in demanding landscaping environments. The tool utilizes SK5 high-carbon steel blades that have undergone rigorous drop forging and heat treatment to ensure superior sharpness and long-term durability. Designed with an ergonomic PVC handle, it minimizes operator fatigue during extended use while providing a reliable grip.

Technical Specifications

Blade Material	SK5 High-Carbon Steel
Construction Method	Drop Forged
Heat Treatment	Yes

Design & Ergonomics

Handle Material	PVC
Key Features	Straight Head, Spring-loaded, Rust Resistant, Ergonomic Grip
