

Striking Face Box Wrench

This heavy-duty striking box wrench is designed for applying high torque. It features a 12-point box end for secure engagement and reduced slippage when loosening or tightening stubborn nuts and bolts.

Overview

Professional Striking Face Box Wrench

This heavy-duty striking box wrench is engineered for applications requiring high-torque force on stubborn fasteners. Featuring a robust 12-point box end, the tool ensures secure engagement and minimizes the risk of slippage during operation. It is specifically designed to be used with a hammer or striking tool, making it an essential implement for demanding industrial, construction, and automotive environments.

Technical Specifications

Key Features

- Designed for use with striking tools
- High-torque capability
- Durable heavy-duty construction
- Reduced slippage design

Size Configuration	30x32 mm
Model Identifier	188 V
End Design	12-point box end
Application Compatibility	Industrial, Construction, Automotive
