

Striking Face Box Wrench

The striking box wrench is designed for applying significant force to fasteners. It features a closed-end, multi-point box design and a striking surface for use with a hammer.

Product Overview

Heavy-Duty Striking Box Wrench

The striking face box wrench is engineered for high-torque applications where significant force is necessary to break loose stubborn fasteners. Featuring a robust closed-end, multi-point box design, it ensures a secure grip and minimizes the risk of slippage during operation. The dedicated striking surface allows for the use of a hammer or impact tool to deliver the required force, making it an essential tool for demanding industrial environments.

Technical Specifications

Model Number	22001A
Material	High-strength alloy steel
Finish	Black corrosion-resistant finish

Key Features

Attributes	Heavy-duty, Multi-point box, Corrosion-resistant, Industrial-grade
