Product Overview

High-Performance Stump Grinder Teeth

These professional-grade stump grinder teeth are engineered for high efficiency and consistent cutting performance in demanding wood-clearing applications. Constructed from premium AISI4142 steel with durable tungsten carbide tips, they are designed to maintain faster sweep speeds and reduce operational downtime. Ideal for agricultural and landscaping machinery, these aftermarket components provide an excellent balance of durability and economic value.

Technical Specifications

Body Material	AISI4142 Steel
Tip Material	Tungsten Carbide
Carbide Size	28 mm
Hardness	HRC38~42
Weight	0.15 kg

Available Models

Supported Models

- 1100S
- 900S
- 700S
- 500S

Certifications

Quality Standards	ISO 9001:2008
