

Stump Grinder with 13HP Engine

This stump grinder is designed to improve the working experience. Heavy-duty inner and outer belt guards protect the operator and increase belt longevity, while a power band belt with idler bearing provides efficient grinding.

Product Overview

Professional Performance

The WBSG13H stump grinder is engineered to provide efficient and reliable stump removal for both commercial and residential applications. Featuring a powerful 13HP engine, this unit delivers consistent grinding performance to tackle challenging landscapes with ease. The machine includes heavy-duty belt guards and an idler bearing power band system to ensure operator safety and maximize component longevity.

Technical Specifications

Model	WBSG13H
Engine Power	GX390H1 13HP

Performance Metrics

Grinding Capacity

8 pcs Teeth Count	355 mm Cutter Disc Diameter	30 mm Cutter Disc Bearing Size
Cutter Depth Below Ground	229 mm	
Cutter Depth Above Ground	534 mm	

Key Features

Operator Safety & Maintenance	Heavy-duty inner belt guards, Heavy-duty outer belt guards, Idler bearing system
