Product Overview

Professional Stump Grinding Solutions

These professional-grade stump grinding teeth are engineered for high-performance land clearing and agricultural site preparation. Constructed from high-quality, impact-resistant steel, they offer extended wear life and precision-cut geometry for efficient tree stump removal. Designed for seamless compatibility with a wide range of industry-standard stump grinder brands and attachments, they are the ideal choice for maintaining clear pathways and improving land usability.

Technical Specifications

Mounting Configuration

- Dual-hole mounting plate
- Threaded mounting holes
- Reinforced cutting slot
- Heavy-duty attachment base

Compatible Systems

Vermeer, Rayco, Yellow Jacket, Carlton, Praxis, Greenteeth, Toro, Dosko, Bluebird, DR

Performance

Key Performance Attributes

High-Impact Resistance • Precision-Engineered Edge • Agricultural Grade • OEM Compatibility
