Product Overview

Professional Submersible Aquarium Pump

This high-performance submersible aquarium water pump is designed for efficient water circulation and oxygenation in small to medium-sized aquatic environments. Engineered for quiet operation and durability, it features a compact footprint and reliable 24V power supply for consistent aquatic life support. With a versatile design including suction cup mounting and optimized intake, it is an ideal solution for powering filtration systems and maintaining water movement.

Key Metrics

Performance Features

2500 L/H

Max Flow Rate

3.5 m
