

Submersible Bilge Pump for Marine Use

This submersible bilge pump is designed to remove water from boat bilges or other confined spaces. It features a durable plastic housing, an efficient motor, and a compact design for easy installation.

Product Overview

Compact Marine Bilge Pump

This submersible bilge pump is engineered for efficient water removal from boat bilges and confined marine environments. Its robust plastic housing ensures long-term durability against harsh maritime conditions. The compact design facilitates seamless installation in tight spaces while maintaining high operational efficiency for reliable performance.

Technical Specifications

Key Features

- Compact form factor
- High-efficiency motor
- Corrosion-resistant plastic housing

Applications	Marine, Bilge Drainage, Confined Space Water Removal
Housing Material	Durable Plastic
Submersible	Yes
