

Submersible Bilge Pump with Stainless Steel Housing

Submersible bilge pump designed for efficient water removal in marine and industrial applications. Constructed with a durable stainless steel housing and a robust motor for reliable performance.

Product Overview

Professional Grade Submersible Pump

This high-efficiency submersible bilge pump is engineered for demanding marine and industrial environments. Featuring a rugged stainless steel housing, it offers superior durability and resistance to corrosion during continuous operation. The integrated thermal overload protection ensures reliable performance and longevity, while the bottom suction design allows for maximum water extraction.

Technical Specifications

Housing Material	Stainless Steel
Outlet Connection	Brass
Safety Protections	Thermal Overload Protection, Submersible Design

Application

Suitable Environments

- Marine water removal
- Industrial drainage
- Clean water pumping
- Slightly contaminated water management
