

# Submersible Borehole Water Pump for Deep Wells

This submersible borehole pump is designed for water supply from wells or reservoirs, as well as for domestic, civil, and industrial applications. It is also suitable for garden and irrigation purposes.

## Overview

### Submersible Borehole Pump

This high-performance submersible borehole pump is engineered for efficient water supply from deep wells and reservoirs. Designed for versatility, it is suitable for a wide range of domestic, civil, and industrial applications, including garden irrigation and pressure boosting. Built for reliability in demanding environments, the pump features a rewindable motor and is constructed to withstand specific operational limits for long-term service.

## Operating Conditions

Maximum Fluid Temperature	35 °C
Maximum Sand Content	0.15 %
Maximum Immersion Depth	50 m
Minimum Well Diameter	4 inches

## Motor and Pump

### Voltage Options

- Single-phase: 220V - 240V/50HZ
- Three-phase: 380V - 415V/50HZ

Motor Type	Rewindable
Motor Features	Built-in capacitor (Single-phase), Rewindable

## Compliance and Standards

### Certifications & Standards

ISO 9906 • CE • RoHS • GS • CCC

## Support

Warranty	2 years
