

Submersible Cast Iron Water Pump

This heavy-duty submersible water pump is designed for demanding drainage and irrigation applications. Its robust cast iron construction ensures durability and a long service life.

Product Overview

Heavy-Duty Submersible Pump

This submersible water pump is engineered for demanding drainage and irrigation tasks in challenging environments. Constructed from robust cast iron, it offers exceptional durability and a long service life. Its high-efficiency motor ensures powerful pumping performance, even when handling solids and debris.

Technical Specifications

Design Advantages

- Robust cast iron construction
- High-efficiency motor
- Easy installation process
- Simple maintenance requirements

Body Material	Cast Iron
Suitable Applications	Drainage, Irrigation, Solids Handling
