

Submersible Centrifugal Water Pump

This submersible pump is designed for a variety of applications. It has stainless steel components including the pump head, check valve, impeller, guide shell, filter, wire cover, and tie rod.

Product Overview

Submersible Centrifugal Water Pump

This high-performance submersible centrifugal pump is engineered for reliability and durability in demanding water extraction applications. Constructed with premium stainless steel components, including the pump head, impeller, and guide shell, it ensures longevity and resistance to corrosion. Designed for versatility, this pump is compatible with both 4-inch and 6-inch wells and is available in a wide range of models to suit various flow and head requirements.

Technical Specifications

Available Series

- SP-05
- SP-10
- SP-18
- SP-25
- SP-40
- SP-70

Compatible Well Sizes

4 inch, 6 inch

Construction & Materials

Material Composition

Stainless Steel Pump Head • Stainless Steel Impeller • Stainless Steel Guide Shell • Stainless Steel Filter • Stainless Steel Wire Cover • Stainless Steel Tie Rod

Integrated Components

- Check Valve
- Impeller
- Guide Shell
- Filter
- Wire Cover
- Tie Rod
