

Submersible Clean Water Removal Pump

This submersible pump is designed for efficient water removal. It is ideal for draining pools, ponds, and flooded areas, and features a float switch for automatic operation.

Overview

High-Efficiency Submersible Water Pump

This powerful 750W submersible pump is engineered for efficient clean water removal in various residential and commercial applications. Equipped with a reliable copper wire motor and built-in thermal protection, it ensures long-term durability and safety during operation. The inclusion of a float switch allows for automatic water level management, making it an ideal choice for draining pools, ponds, and flooded areas.

Performance Metrics

Key Performance Indicators

750 W

Power
