

# Submersible Clear Water Pump for Garden Use

This submersible clear water pump is designed for garden and domestic use. With a maximum flow rate of 10 cubic meters per hour and operating at 2860 RPM, it efficiently drains water from pools, ponds, and flooded areas.

## Overview

### Clear Water Submersible Pump

The YC-250P is a reliable submersible pump specifically engineered for effective clear water management in residential and garden settings. Capable of handling clean or slightly dirty water, it is ideal for draining pools, ponds, and areas affected by minor flooding. With a robust motor and high-performance design, this unit provides the durability needed for consistent domestic utility.

## Performance Metrics

### Maximum Flow Rate

**10 m<sup>3</sup>/h**

Max Flow Capacity

## Technical Specifications

Operating Voltage	230 V
Frequency	50 Hz
Rotation Speed	2860 r/min

## Usage Information

Ideal Applications	Garden Irrigation, Pool Draining, Pond Maintenance, Flood Relief
