

Submersible Deep Well Borehole Pump

This borehole pump is designed for water supply from wells and reservoirs, as well as domestic, civil, and industrial applications. It is also suitable for garden and irrigation purposes.

Product Overview

High-Performance Submersible Borehole Pump

This submersible deep well borehole pump is engineered for reliable water extraction in domestic, civil, and industrial applications. Designed for efficiency and durability, it is suitable for water supply from wells or reservoirs, as well as garden and irrigation systems. The unit features a rewindable motor and is available in both single-phase and three-phase configurations to suit diverse power requirements.

Operating Conditions

Maximum Fluid Temperature	35
Maximum Sand Content	0.15 %
Maximum Immersion Depth	50 m
Minimum Well Diameter	4 inch

Motor & Electrical

Available Voltages

- Single-phase: 220V - 240V/50Hz
- Three-phase: 380V - 415V/50Hz

Motor Type	Rewindable
Control Options	Start control box, Digital auto-control box, Built-in capacitor (single-phase)

Compliance & Warranty

Certifications

ISO 9001 • CE • RoHS

Warranty	2 years
Standards	ISO 9906
