

# Submersible Deep Well Water Pump

This submersible pump efficiently extracts water from deep wells. It features a durable stainless steel body, a multi-stage pump system, and a screen filter.

## Overview

### Reliable Water Extraction

This submersible deep well water pump is engineered for efficient and consistent water extraction in demanding environments. Featuring a robust multi-stage system encased in a durable stainless steel body, it offers superior corrosion resistance and longevity. Designed with an integrated screen filter, the unit effectively prevents debris intake, ensuring reliable performance for residential, agricultural, and industrial water supply needs.

## Technical Specifications

Pump Diameter	6 inch
Body Material	Stainless Steel
Filtration	Yes

## Application

Suitable Applications	Residential, Agricultural, Industrial
