

Submersible Deep Well Water Pump

High-quality submersible deep well water pumps are designed for efficient water extraction from wells. Constructed with durable materials for long-lasting performance in demanding environments, these pumps are suitable for irrigation, domestic water supply, and industrial use.

Product Overview

Professional Submersible Water Solution

This submersible deep well water pump is engineered for efficient water extraction in demanding civil, industrial, and agricultural environments. Built to NEMA dimension standards with a rewinding-capable motor, it offers robust performance and long-term reliability. Its versatile design supports both single-phase and three-phase power requirements, making it an ideal choice for irrigation, residential supply, and industrial reservoir management.

Operating Conditions

Max Fluid Temperature	35 °C
Maximum Immersion Depth	80 m
Max Sand Content	0.25 %
Minimum Well Diameter	4 in

Technical Specifications

Motor Options

- Rewindable motor
- Full obturated screen motor

Single-phase Voltage	220V-240V/50Hz
Three-phase Voltage	380V-415V/50Hz

Compliance & Quality

Warranty Period

1 Year Warranty

Standards Compliance	NEMA Standard, ISO 2548
----------------------	-------------------------

Applications

Typical Applications

- Water supply from wells or reservoirs
- Domestic water supply
- Civil and industrial water systems
- Garden use and irrigation
