

Submersible Deep Well Water Pump

This submersible water pump is designed for deep well applications. It features a durable stainless steel construction for corrosion resistance and long-lasting performance.

Product Overview

Professional Submersible Deep Well Pump

This high-performance submersible water pump is specifically engineered for reliable deep well and borehole applications. Built with durable stainless steel, the unit provides excellent corrosion resistance and ensures a long service life in demanding environments. It is an ideal solution for consistent water extraction across residential, agricultural, and industrial supply systems.

Technical Specifications

Well Size Compatibility

6 inch

Well Diameter

Recommended Applications

- Residential Water Supply
- Agricultural Irrigation
- Industrial Water Extraction
- Borehole Systems

Construction Material

Stainless Steel

Features

Key Performance Features

Corrosion Resistant • Submersible Design • High Efficiency
