

Submersible Deep Well Water Pump

This submersible deep well water pump is designed for efficient water extraction from deep wells. Constructed with durable materials for long-lasting performance, this pump is suitable for various applications including irrigation, domestic water supply, and industrial uses.

Overview

High-Efficiency Deep Well Extraction

The 4SKD submersible deep well water pump is engineered for reliable and efficient water extraction from deep-source wells. Featuring a robust multi-stage impeller system, it delivers consistent high pressure and flow rates suitable for irrigation, domestic supply, and industrial applications. Its compact, durable design includes thermal motor protection and an integrated check valve for enhanced safety and longevity.

Technical Specifications

Design Advantages

- Compact design for narrow wells
- Multi-stage impeller system
- Durable construction for long-term use

Pump Type	Submersible Deep Well Pump
Protection Features	Thermal Motor Protection, Built-in Check Valve

Applications

Suitable Applications

Irrigation • Domestic Water Supply • Industrial Use
