

Submersible Deep Well Water Pump

This submersible deep well pump is designed for efficient water extraction from deep wells. Its stainless steel construction ensures durability and corrosion resistance, making it suitable for irrigation, domestic water supply, and industrial use.

Product Overview

High-Performance Submersible Deep Well Pump

This submersible deep well pump is engineered for efficient water extraction in demanding environments. Featuring a robust stainless steel construction, it offers exceptional durability and corrosion resistance for long-term operation. It is a versatile solution suitable for a wide range of applications, including agricultural irrigation, domestic water supply systems, and industrial water management.

Technical Details

Material	Stainless Steel
Available Models	S4C, S4D

Applications

Primary Applications

- Agricultural Irrigation
- Domestic Water Supply
- Industrial Water Extraction

Performance

Key Performance Indicators

4 inch

Pump Diameter
