

Submersible Drainage Pump with Float Switch

This submersible pump is designed for dewatering, flood control, and water transfer applications. It features a float switch for automatic operation and is constructed with corrosion-resistant materials for durability.

Product Overview

Versatile Drainage Solution

The QDX-FA-3 is a robust and efficient submersible drainage pump designed for dewatering, flood control, and general water transfer. Featuring durable, corrosion-resistant construction, it is built to withstand demanding environments while maintaining a compact footprint for easy installation. The integrated float switch enables automatic operation, providing a dependable and low-maintenance solution for both residential and commercial water removal needs.

Technical Specifications

Application Scope	Domestic, Gardening, Irrigation, Tank Emptying, Flood Control
Compatible Media	Clean water (non-abrasive)

Key Features

Design Advantages

- Compact design for confined spaces
- Reliable performance
- Easy to use

Automatic Operation	Yes
Construction Material	Corrosion-resistant
