

Submersible Drainage Pump with Float Switch

This submersible pump is designed for drainage and irrigation applications. It features a stainless steel construction for durability and corrosion resistance, and is equipped with a float switch for automatic operation based on water level.

Product Overview

Professional Drainage Solution

This submersible drainage pump is engineered for reliability in both agricultural and residential settings. Built with high-grade stainless steel, it offers exceptional durability and resistance to corrosion, ensuring a long operational life. The integrated float switch provides convenient automatic operation, activating the pump based on precise water levels to prevent flooding and optimize irrigation efficiency.

Technical Specifications

Suitable Media

- Clean water
- Slightly dirty water

Construction Material	Stainless Steel
Operation Type	Automatic, Float Switch Included

Applications

Primary Applications

Drainage • Irrigation • Residential • Agricultural
