

Submersible Drainage Water Pump

This submersible water pump is designed for drainage and irrigation. It features robust construction and a protective screen.

Product Overview

Submersible Drainage Water Pump

This high-performance submersible water pump is specifically engineered for efficient drainage and irrigation applications. Its robust design incorporates a specialized protective screen that prevents debris intake, ensuring reliable operation in demanding environments. Ideal for agricultural water management, this pump provides powerful water transfer capabilities to support your irrigation needs.

Key Features

Build Quality

- Robust heavy-duty construction
- Integrated debris intake protective screen
- Submersible design for fluid immersion

Recommended Applications

Agricultural Irrigation, Water Drainage, Water Transfer

Performance Metrics

Pump Type

Submersible • Drainage
