

# Submersible Drainage Water Pump with Float Switch

This submersible water pump is designed for drainage and irrigation. It features a float switch for automatic operation and is suitable for removing water from flooded areas, pools, and basements.

## Product Overview

### High-Efficiency Drainage Solution

This submersible water pump is engineered for reliable performance in drainage and irrigation applications. Featuring a robust blue and black housing and an integrated float switch, it provides fully automatic operation for flood management in basements, pools, and other submerged areas. The unit is designed for ease of use, incorporating a built-in carry handle and a universal hose adapter for seamless installation.

## Key Features

### Operational Modes

Submersible, Automatic Operation, Float Switch Controlled

## Design and Build

### Design Specifications

- Robust blue and black housing
- Portable carry handle
- Integrated hose adapter connection

## Application

### Recommended Use Cases

Basement Drainage • Pool Maintenance • Flood Water Removal • Irrigation
