

Submersible Drainage Water Pump with Float Switch

This submersible water pump is designed for drainage and irrigation. It is equipped with a float switch for automatic operation and is suitable for pumping water from flooded areas, ponds, and other water sources.

Product Overview

Submersible Drainage Water Pump

This submersible water pump is engineered for efficient drainage and irrigation tasks in demanding environments. Featuring a durable metallic construction, it offers long-term reliability for clearing water from flooded areas or ponds. The integrated float switch ensures fully automatic operation, providing peace of mind and operational convenience for professional users.
