

Submersible Fountain Pump with Adjustable Nozzles

This submersible fountain pump is designed for decorative water features. It features adjustable flow control, multiple nozzle options for varied spray patterns, and a durable, corrosion-resistant housing.

Product Overview

Versatile Fountain Pump Solution

This submersible fountain pump is expertly designed for decorative water features, offering reliable performance for both indoor and outdoor applications. It features adjustable flow control and multiple nozzle options to create varied, visually appealing spray patterns. Built with a durable, corrosion-resistant housing and an integrated filter, it ensures long-lasting operation and effective water circulation and aeration.

Technical Specifications

Power Supply	Standard European Voltage
Flow Control	Yes
Nozzle Options	Adjustable, Multiple Patterns

Design & Build

Housing Material	Corrosion-resistant
Filtration System	Built-in filter included

Applications

Usage Environment

- Indoor Water Features
- Outdoor Water Features
- Water Aeration
