

Submersible Garden Water Pump - 250W, 8 m³/h

This submersible pump is designed for garden and general water removal applications. It operates on 220-240V~50Hz power supply with a maximum flow rate of 8 cubic meters per hour.

Overview

High-Efficiency Submersible Garden Pump

This submersible water pump is engineered for reliable garden irrigation and general water removal tasks. With a robust 250W power rating, it delivers efficient fluid transfer suitable for various residential and light commercial applications. The unit is built to withstand continuous underwater operation, ensuring durability and consistent performance in demanding environments.

Performance Metrics

Key Performance Indicators

250 W

Power Output

8 m³/h

Max Flow Rate

7 m

Max Head

Technical Specifications

Ingress Protection

IP68

Power Supply

220-240V~50Hz

Max Immersion Depth

6 m

Operating Limits

Temperature Tolerances

Parameter	Limit
Max Fluid Temperature	35°C
Max Ambient Temperature	40°C
