Overview

High-Performance Submersible Illumination

Designed for demanding aquatic environments, this submersible LED fountain light combines high-brightness chip technology with superior thermal management. The unit features a durable, corrosion-resistant housing suitable for fountains, pools, and decorative water features. With advanced DC drive technology, it operates silently without flickering, offering significant energy efficiency compared to traditional lighting solutions.

Technical Specifications

Available Wattages

- 9W
- 12W
- 18W

Model Identifiers

SDD-001-9W, SDD-001-12W, SDD-001-18W

Performance Metrics

Energy Efficiency

62 % Energy Savings	5 W Power Rating
