Product Overview

Professional Underwater Illumination

The CED series submersible LED pond light is engineered for high-performance aquatic illumination, ideal for fountains, ponds, and decorative water features. It combines high-luminosity LED technology with energy-efficient operation to minimize power consumption while maximizing visual impact. Constructed with a durable, corrosion-resistant housing, this light is fully submersible and built for long-term reliability in demanding underwater environments.

Technical Specifications

Key Features

- Corrosion-resistant housing
- Submersible design
- Adjustable mounting bracket
- High luminosity output

Certifications	CE, GS
Operational Power	Low-voltage transformer included
Light Source	Energy-efficient LED

Model Compatibility

Supported Models

- D7
- D8
- D9
- D10
- D11
- D12
- LAE-ECOLIGHT-12A
