Product Overview

Submersible Plastic Water Pump

This submersible plastic water pump is designed for efficient water removal in diverse environments such as basements, ponds, and construction sites. Equipped with an integrated float switch, it enables automatic operation for reliable drainage management. Its durable plastic housing ensures longevity, while the robust motor delivers high-performance water transfer capabilities.

Performance Metrics

Rated Power

750 W

Rated Power

Maximum Flow Rate	12.5 m ³ /h
Maximum Lift	9.5 m
Maximum Working Pressure	1.3 bar

Operational Limits

Maximum Diving Depth	7 m
Maximum Particle Passage	5 mm

Compliance & Certification

Electrical Specifications

- 10(3)A
- 250V AC

Certifications	CE, TÜV, IP68
