

Submersible Sewage Pump

Submersible sewage pump designed for efficient wastewater and drainage management. Features a robust construction for durability and reliable performance in demanding environments.

Product Overview

Professional Sewage Management

This high-performance submersible sewage pump is engineered for efficient wastewater and drainage management in demanding industrial, municipal, and agricultural environments. Built with a robust construction, it ensures reliable long-term performance and durability. The unit is specially designed for high flow rates and superior solids handling, making it an ideal choice for critical infrastructure and drainage applications.

Technical Specifications

Performance Features

- High flow rate capability
- Advanced solids handling design
- Submersible construction
- Durable housing for harsh environments

Operation Type

Submersible • Heavy-duty

Application Areas

Industrial, Municipal, Agricultural
